

PISA Practice Items 1

The PISA practice bank consists of questions from previous cycles of the PISA international study, along with additional practice materials. These items are aligned with the PISA framework and provide students with a valuable opportunity to familiarize themselves with the types of questions and skills assessed in the actual PISA exams.

Each practice entails two items. Your students can access the PISA practice links (in Table 1) in the three subject areas: Reading, Mathematics, and Science using their eSIS IDs.
